RaceMeasure Certification/Measurement Contract

For the consideration of \$ _____, RaceMeasure will

Certify Modify a concept Plan

a racecourse being _____ in length. This course shall be known as

_____.

For a Certification, RaceMeasure will:

- 1) Measure a pre-determined course as set forth by the client
- 2) Submit paperwork for certification to USATF

Following full payment to RaceMeasure, RaceMeasure will:

- 3) Furnish the certification Certificate to the client
- 4) Furnish the certification map of the course, in PDF format
- 5) Post the certification map, including elevation profile and printable PDF link, on www.RaceMeasure.com/ _____
- 6) Mark the Start, Finish, and all pertinent splits, with (where permitted) nails/washers, and paint marking. Painting will consist of lettering and a simple stripe. As the course is normally run on public streets and trails, minimal visual impact is desired. Descriptions of each location will be included with the Certification Map, so the client can easily locate splits. Where pavement is not present, detailed descriptions and GPS coordinates will be provided.

Modify a Concept means:

RaceMeasure will take the client's proposed course and modify it as needed to reach the desired length. **This is not included in standard pricing**, and will incur a higher fee. *Slight* modification of a course (move Start, Finish, or Turnaround a short distance) does not fall under this description.

Plan a Course means:

The client has a general idea of where the course shall be, but has not measured, and is not sure of the final layout. RaceMeasure will determine a suitable course and submit it for the client's approval, prior to measuring for certification.
